# Welcome

The NSW Tax Forum remains one of Australia's premier tax events, bringing together leading tax professionals for discussion, learning and connection. The 2026 program has been carefully curated to reflect the increasing complexity of the tax landscape, ensuring practitioners at every level gain relevant insights to stay ahead.

If you work in tax or advise on tax matters, this is an event you need to attend. With three dedicated streams – **SME**, **Corporate** and **Hot Topics (including Emerging Leaders)**, you will gain access to timely technical updates and practical insights to support you, your team and your clients.

## Practical insight across key tax areas

The **SME stream** is designed for professionals advising private businesses, family groups and high net worth clients. It focuses on the practical and technical challenges faced by SME advisers, including structuring and restructuring, trusts and Division 7A, asset protection, estate and succession planning, ATO engagement, and managing risk in an increasingly complex regulatory environment.

The **Corporate stream** is designed to address the tax issues faced by large and complex organisations. The 2026 program explores domestic and international tax developments, integrity and anti-avoidance measures, capital management, major transactions, litigation and dispute strategy, and the evolving impact of global reform, technology and economic change on corporate tax functions.

The **Hot Topics stream** focuses on the most current and fast-moving areas of tax, addressing emerging risks, regulatory change and issues that are front of mind for practitioners. Sessions span state and indirect taxes, superannuation, ethics and governance, private equity and complex transactions, global trade and customs, and the growing role of technology and AI in tax practice.

Within the Hot Topics stream, the **Next Generation mini-stream** features four dedicated sessions for those new to the profession or for those wanting a refresher on some key topics and core skills including The 'Tax' Professional, the tax treatment of cryptocurrency and digital assets, the implications of Payday Super, and thinking independently.

## A leading event for tax professionals

The NSW Tax Forum is designed to spark conversation, challenge thinking and provide practical takeaways you can apply immediately. With more than 700 tax professionals attending each year, it remains a cornerstone event for the profession.

**Day 1** Thursday, 21 May 2026

Time	SME stream	Corporate stream	Hot Topics stream
8:00 – 8:30am	Registration		
8:30 – 9:30am	<p><b>Session 1A: Division 7A and Trusts</b>  <b>Speaker: Danielle Constantine, William Buck</b>            Division 7A remains a challenging area for SME practitioners, especially where trusts and private groups are involved. Recent judicial decisions have shifted key principles, increasing the need for practical and compliant solutions.</p> <p>This session will give a current overview of Division 7A issues affecting trusts, drawing on recent case law and ATO guidance. Presenters will outline the practical implications for advisers, common problem areas and strategies to manage Division 7A exposure.</p>	<p><b>Session 1B: US Political Shifts: Cross-Border Impacts for Australia and our region</b>  <b>Speakers: Alia Lum, CTA, KPMG, Peter Oliver, CTA, KPMG</b></p> <p>The evolving US political landscape continues to influence global tax policy, creating material implications for Australian corporate groups with US connections. This session will examine key US tax policy trends under the current administration and how they are shaping tax policy reactions globally and across our region. Within an environment of increasing policy uncertainty, we will consider the practical impacts on Australian businesses operating or expanding in the US, and considerations for US-headquartered groups with Australian subsidiaries. The session will also explore strategies to manage compliance and uncertainty, as well as the risks and opportunities emerging for Australian entities navigating US cross-border settings.</p>	<p><b>Session 1C: Superannuation Cap</b>  <b>Speaker: Graeme Colley, The Auditors Institute</b></p> <p>This session provides a practical look at the superannuation cap changes and what they mean in the post-implementation landscape. With the dust now settled, the session will explore how individuals below the cap are treated under CPI protection, what the changes mean for those with balances between \$3 million and \$10 million and whether very large balances still have viable planning options. The discussion will consider how outcomes vary depending on an individual's balance, how alternative strategies stack up over a lifetime and the implications for estate planning.</p>
9:30 – 10:30am	<p><b>Session 2A: Trust Distributions and Family Trust Elections</b>  <b>Speaker: Jane Harris, CTA, Brown Wright Stein Lawyers</b></p> <p>This session provides a deep dive into the tax implications and compliance risks associated with trust distributions and family trust elections (FTEs). With the ATO's increasingly rigid approach to family trust distribution tax and the strict application of the family group rules, practitioners must be vigilant in managing FTEs, interposed entity elections (IEEs) and beneficiary distributions.</p> <p>The session will explore governance strategies and practical risk mitigation techniques in managing trust distributions.</p>	<p><b>Session 2B: Pillar 2 and Tax Transparency</b>  <b>Speaker: Jayde Thompson, Alvarez &amp; Marsal</b></p> <p>This session is an exploration of Pillar 2 and the expanding international transparency measures reshaping the corporate tax landscape. The discussion will cover the practical implications of Pillar 2 and US side-by-side reporting, what increased disclosure means for multinational groups and how organisations can prepare for greater visibility and regulatory expectations. It will also touch on compliance challenges, data readiness and the broader impact on governance and risk management from a Pillar 2 and US side-by-side reporting perspective.</p>	<p><b>Session 2C: Trade in Turmoil: Customs, Tariffs and Strategic Planning in a Disrupted Global Environment</b>  <b>Speaker: Richard Nutt, Grant Thornton</b></p> <p>This session will provide an overview of Australia's customs and tariff framework with a focus on recent global trade disruptions. Attendees will gain practical insights into compliance, valuation and strategic planning in the face of rising protectionism and shifting bilateral trade dynamics.</p>

11:00am–12:00pm	<p><b>Session 3A: Business Restructuring: Options for SME Groups</b>  <b>Speaker: Spyros Kotsopoulos, CTA, Deloitte</b></p> <p>Many private enterprises evolve organically to a point where entities are used for multiple, and sometimes incompatible, purposes. This often creates the need to restructure into a form that better supports current requirements or future plans.</p> <p>This session will explore the key alternatives available for restructuring, including:</p> <ul style="list-style-type: none"> <li>• Determining the appropriate vehicles or structures for different purposes</li> <li>• Options for restructure (rollover, sale of entity interests and sale of assets)</li> <li>• Relevant rollovers that may be available (key rollovers, including Subdivision 122-A, Subdivision 122-B, Subdivision 124-M, Subdivision 124-N, Division 125, Division 615 and Subdivision 126-G)</li> <li>• Timing of a restructure and “back-to-back” rollover considerations.</li> </ul>	<p><b>Session 3B: Thin Cap</b>  <b>Speakers: Clement Lui, PwC Australia, James Nickless, PwC Australia</b></p> <p>This session provides a practical update on the new thin capitalisation rules and their impact on corporate taxpayers. The discussion will cover the operation of the debt deduction rules, key points from recent ATO guidance and examples, and the emerging questions arising from the first round of filings. It will also walk through the group ratio test and third party debt test, highlighting common challenges and important considerations for compliance and planning.</p>	<p><b>Session 3C: Land Tax Exemptions: Increasingly Difficult to Obtain</b>  <b>Speaker: Matthew McKee, FTI, Brown Wright Stein Lawyers</b></p> <p>As land values continue to rise across NSW and thresholds remain frozen, land tax is emerging as a significant cost for property owners – particularly those relying on exemptions. This session provides a detailed analysis of the principal place of residence (PPR) and primary production exemptions under the <i>Land Tax Management Act 1956</i> (NSW). We will explore the 2024 amendments to the PPR exemption, including the 25% ownership threshold, and dissect complex tribunal and court rulings that have reshaped the interpretation of “dominant use” for primary production. Attendees will gain practical insights into exemption substantiation, audit risk management and the broader implications of the complexity of the provisions in a high-value property environment.</p>
